CONTACT MISS DIG

HOMEOWNER / CONTRACTOR REQUIRED TO SCHEDULE INSPECTION 1 DAY (24 HR)
BEFORE INSTALLATION OF SERVICE LINES AND DH071-93 TANK.

ACCEPTABLE MATERIAL FOR SERVICE LINES (not provided)

Plastic 1 1/4 service line IPS, rated 160 psi.
Trace wire (10 gauge solid / stranded) taped from the service line to the lid of the can
42-in minimum bury depth.

DH071-93 TANK INSTALLATION REQUIREMENTS

A concrete base must be installed around the bottom of the tank.
Sumpter Twp has a template for this process and it must be returned after use.

A minimum of 3 rebar handles need to be installed into the concrete base for
lifting tank into place.

Tank must be installed level/plumb.

Tank must be buried to the "ground burial depth" marked on the tank.

SEPTIC TANK WILL BE DECOMMISSIONED BY CONTRACTOR

The septic tank must be pumped out and solids removed, then crushed and
filled with dirt.
